

EDUCATION

University of Southern California Los Angeles, CA	Exp. May 2027
M.S. in Computer Science, specialization in Game Development GPA: 3.8/4.0	
University of Wisconsin-Madison Madison, WI	2022 - 2025
B.S. in Computer Science Minors: Game Design and Mathematics GPA: 3.5/4.0	

TECHNICAL SKILLS

Programming Languages:	Java, Python, C#, JavaScript (React, HTML, CSS), SQL, C++
Tools & Technologies:	Unity Game Engine, VS Code, Agile, AWS Personalize, Perforce, git, Maya Autodesk

PROJECTS

Crease USC Advanced Games Project	Jan 2026 - Present
USC Games	
Developing a 3D flight adventure game where folding letters into paper planes tells the story of a distant father and daughter, built with a large interdisciplinary USC Games team	
IceVite Team Chat Bay Area Adult Hockey League (icevite.com)	2026
Django, HTMX, Bootstrap, Web Push	
- Built native team chat for the league's site after captains couldn't group-message mixed iPhone/Android rosters: private channel per team with captain moderation (pin, delete, mute) - Implemented cross-platform push notifications end to end (VAPID + service workers), no third-party app	
Environment Distributor Snake World	Sep 2025 - Dec 2025
Unity, C#, C++	
- Built a procedural environment system using Perlin noise to generate heightmaps and drive foliage placement across terrain - Implemented Poisson disk sampling to distribute foliage with natural spacing, enforcing exclusion radii around the track and scene objects to prevent overlap	
The H.U.G.S. Protocol 3D Puzzle-Platformer, released on itch.io	2025
Unity 6, C#	
- Co-developed a 3D puzzle-platformer with a two-person core team, sharing programming, design, art, and production from concept through public release - Implemented three physics-based ball abilities (sonar, tungsten, sponge) that drive all puzzle and traversal design	
PBS Wisconsin Recommendation Engine UW-Madison Capstone	Jan 2025 - May 2025
React, Python, Flask, Figma, Vite, AWS (Personalize, S3), REST API, SQL	
- Collaborated with a multidisciplinary team of four and PBS to integrate a recommendation engine into their active site using Amazon Personalize - Designed high- and low-fidelity Figma prototypes influenced by results of 20+ self-conducted user interviews - Developed a responsive frontend using React and Vite to provide personalized content based on user behavior	
Against The Grain Metroidvania Game	Sep 2024 - Dec 2024
Unity, C#, LDK, Aseprite, HacknPlan	
- Implemented 4+ character abilities with animations and gameplay logic as lead programmer on a four-person team - Developed a trajectory system with custom materials for real-time visual feedback - Built a collectibles/NPC system with 15+ interactive characters and branching dialogue	
AI Teeko Game Bot	Sep 2024 - Dec 2024
Python	
Designed an AI system to improve decision-making in Teeko, achieving a 98.7% win rate against baseline opponents	
Badger News App	Sep 2024 - Nov 2024
React/JavaScript, REST API, Postman	
Developed a React app fetching and summarizing 100+ articles with dynamic filtering and personalized news settings	

EXPERIENCE

Carnegie Mellon University National High School Game Academy	May 2021 - Aug 2021
Unity, C#, Perforce, Maya Autodesk, Audacity	
Led a team of five as Producer in developing an original video game, taking charge of programming and design while contributing narrative writing, 2D/3D art, and audio production
